PRECISION OPERATIONALIZED

Xylozen Technologies

Smart Digital Solutions Designed To Help Ideas Grow, Teams Move Faster,
And Businesses Scale Efficiently.

01

COMPANY OVERVIEW

Xylozen Is An AI Native Product Engineering Studio In Chennai, Known To Our Clientele In USA, UK And GCC. In More Than Three Years, We Have Been Transforming Innovative Ideas Of Founders And Corporations Into Scalable Production Ready Products With Precision And Silence.

OPERATIONAL INEFFICIENCY

The Problem

The Market Is Full Of Vendors Short On Partners

Software Is Plentiful In All Markets, Offering Solutions Galore. What Is Missing Is Judgment; That Is, The Skill To Distinguish Between What Is Possible And What Is Desirable.

Complexity Without Strategy

Most Businesses Know They Need AI. Nobody Tells Them Where To Begin, What To Build, Or How It Earns Revenue. They Buy Tools. They Hire Generalists. Nothing Changes.

Agencies That Don't Stay

They Quote, They Build, They Leave. No Strategy. No Ownership. No Outcome. This Becomes A Liability When Words Outpace Actions And Delivery Falls Short Of Commitment.

Technology That Doesn't Fit

Off-The-Shelf Software Wasn't Built For Your Business. It Was Built For Everyone, Which Means It Solves Nothing For Anyone. Real Partnerships Demand More.

THE XYLOZEN DIFFERENCE

Proposed Solution

Workflows Engineered For Output

Mapping From Bottom Up To Broken Down And Finally To Revenue Driven Is How Every Engagement Begins, Being Automated, AI-Driven, And Measuring One Thing; Revenue Impact.

AI At The Foundation, Not Superficial

AI Is Not A Feature That's Been Added Onto The Product. AI Is The Basis Of The Product; Designed From The Ground Up To Be Intelligent And Adaptive.

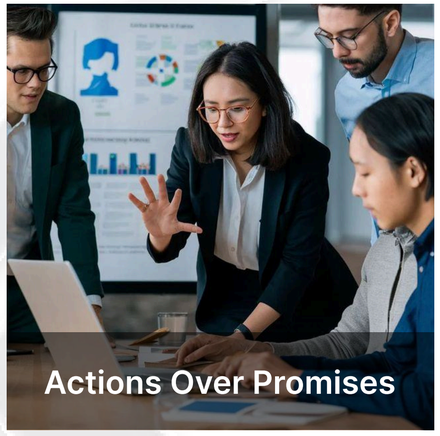
A Studio That Owns The Outcome

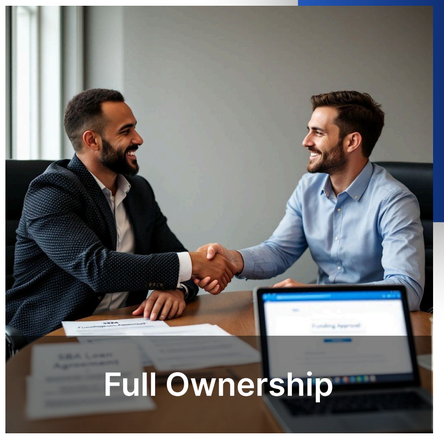
Xylozen Does Not Simply Make Promise; Everything We Do Is Done Perfectly From Discovery To Implementation And Beyond; Same Team, Total Responsibility, Total Ownership.

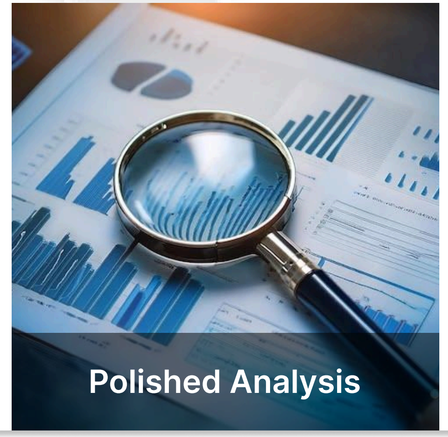
Why Choose Xylozen?

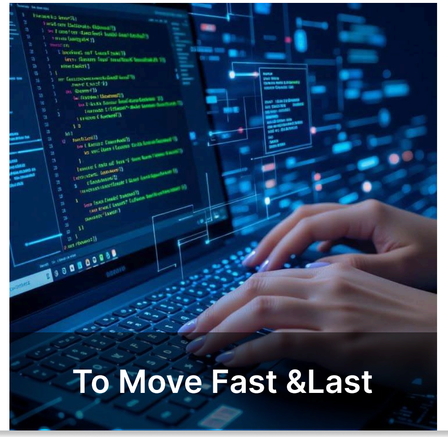
Free Proof Of Concept

Before you put pen to paper or money on the table, we give you a free proof of concept. It’s not a ppt or promises - it’s an honest look into how we approach and do business so that you can see whom you are partnering with before making any commitments.









The Craft Of Xylozen

In Xylozen, each engagement has an end goal in mind, which is achieving a particular business outcome. Let it be te profit, increased efficiency, or scalability through full accountability.

We are in this industry for more than three years and have ventured into international markets like Australia, UK, India, GCC, and Switzerland.

Intelligence Native

Everything we design, whether system, process, or automation, begins and ends with intelligence.

Beyond Vendor

We offer services in Agentic AI, Micro SaaS, web applications, and MVPs. All provided with great accuracy to have an impact.

Shipped 20+ projects, 15 clients, 95% loyalty in three years.

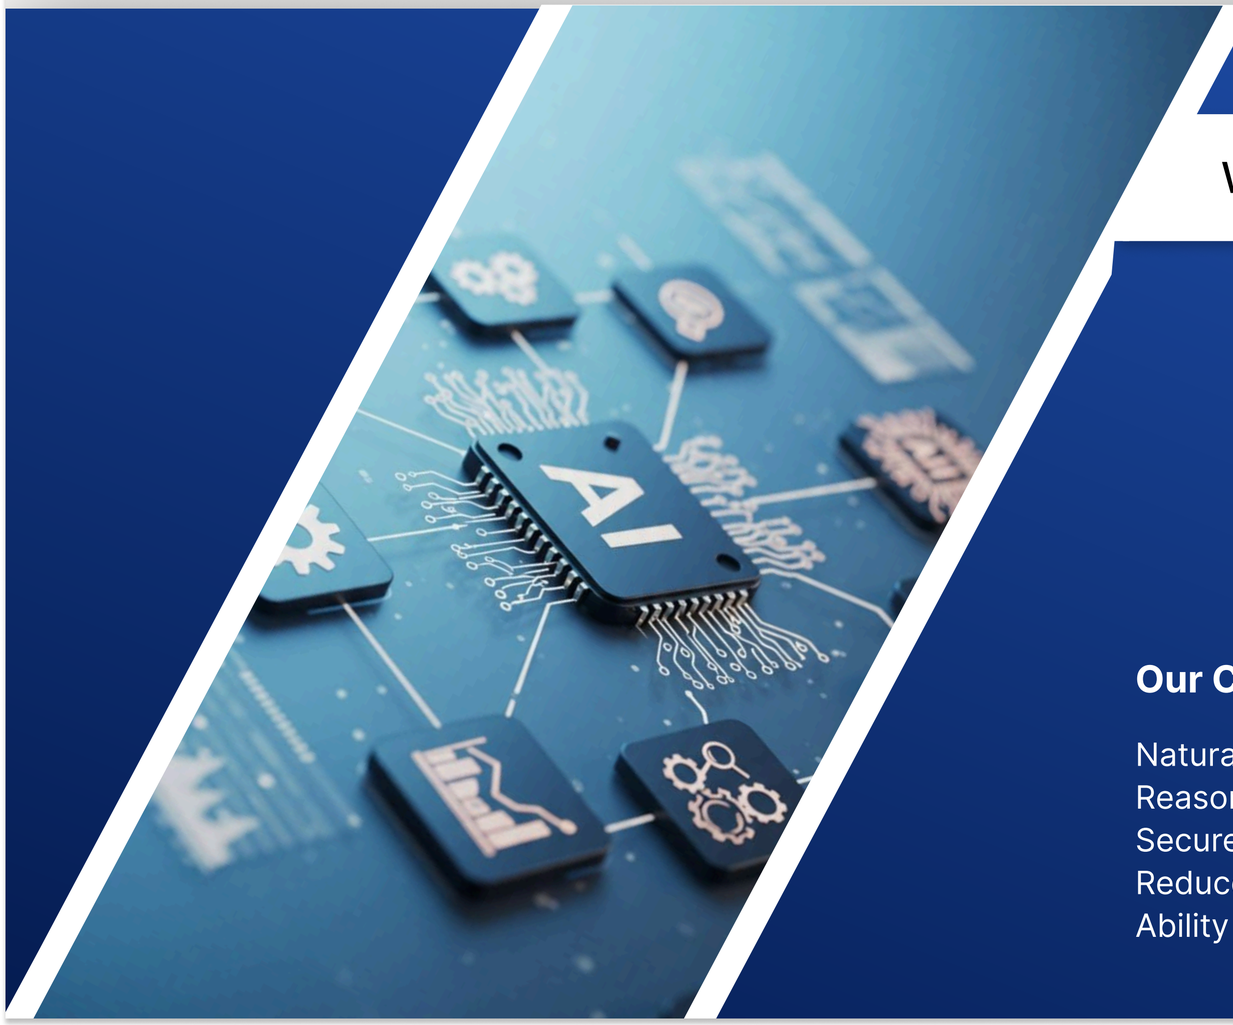
95

SERVICE 1

Agentic AI Systems



WHAT WE BUILD

- AUTONOMOUS AI AGENTS
- WORKFLOW AUTOMATION
- CONVERSATIONAL AI SYSTEMS
- AI-POWERED DECISION ENGINES
- MULTI-AGENT ORCHESTRATION
- ENTERPRISE INTEGRATIONS

Our Capabilities

Natural Language Processing, Context Understanding, Data Retrieval And Reasoning, Tool And API Integrations, Memory And Knowledge Systems, And Secure, Scalable Architecture. Together, These Translate Into Real Business Impact: Reduced Manual Work, Increased Efficiency, Lower Operational Costs, And The Ability To Scale Seamlessly.

SERVICE 2

Web Applications

WHAT WE BUILD

- ENTERPRISE WEB PLATFORMS
- CUSTOMER PORTALS
- INTERNAL MANAGEMENT SYSTEMS
- MARKETPLACE APPLICATIONS
- ANALYTICS DASHBOARDS
- BUSINESS AUTOMATION PLATFORMS

Our Capabilities

Frontend Architecture, Backend Development, Database Design, API Integrations, Cloud Infrastructure, And Secure Authentication Systems. Together, These Translate Into Real Business Impact: Centralized Operations, Improved Customer Experience, Increased Productivity, And Real-Time Analytics.

SERVICE 3

Micro-SaaS Development

WHAT WE BUILD

- SUBSCRIPTION-BASED PLATFORMS
- NICHE SAAS PRODUCTS
- WORKFLOW AUTOMATION TOOLS
- INDUSTRY-SPECIFIC APPLICATIONS
- SELF-SERVICE PLATFORMS
- SCALABLE CLOUD SOFTWARE

Our Capabilities

SaaS Architecture Design, Payment Gateway Integration, Multi-Tenant Systems, API Integrations, Cloud Deployment, And Analytics And Reporting Systems. Together, These Translate Into Real Business Impact: Recurring Revenue, Faster Product Launches, Low Operational Overhead, And Scalable Business Models.

SERVICE 4

MVP Development

WHAT WE BUILD

- PRODUCT PROTOTYPES
- INVESTOR-READY MVPS
- VALIDATION PLATFORMS
- STARTUP APPLICATIONS
- PILOT PRODUCTS
- SCALABLE MVP ARCHITECTURES

Our Capabilities

Product Strategy And Planning, UI/UX Design, Rapid Prototyping, API Integrations, QA And Testing, And Agile Deployment. Together, These Translate Into Real Business Impact: Faster Market Validation, Reduced Development Risk, Quick Product Launches, And Investor-Ready Demonstrations.

Who This Is Built For ?

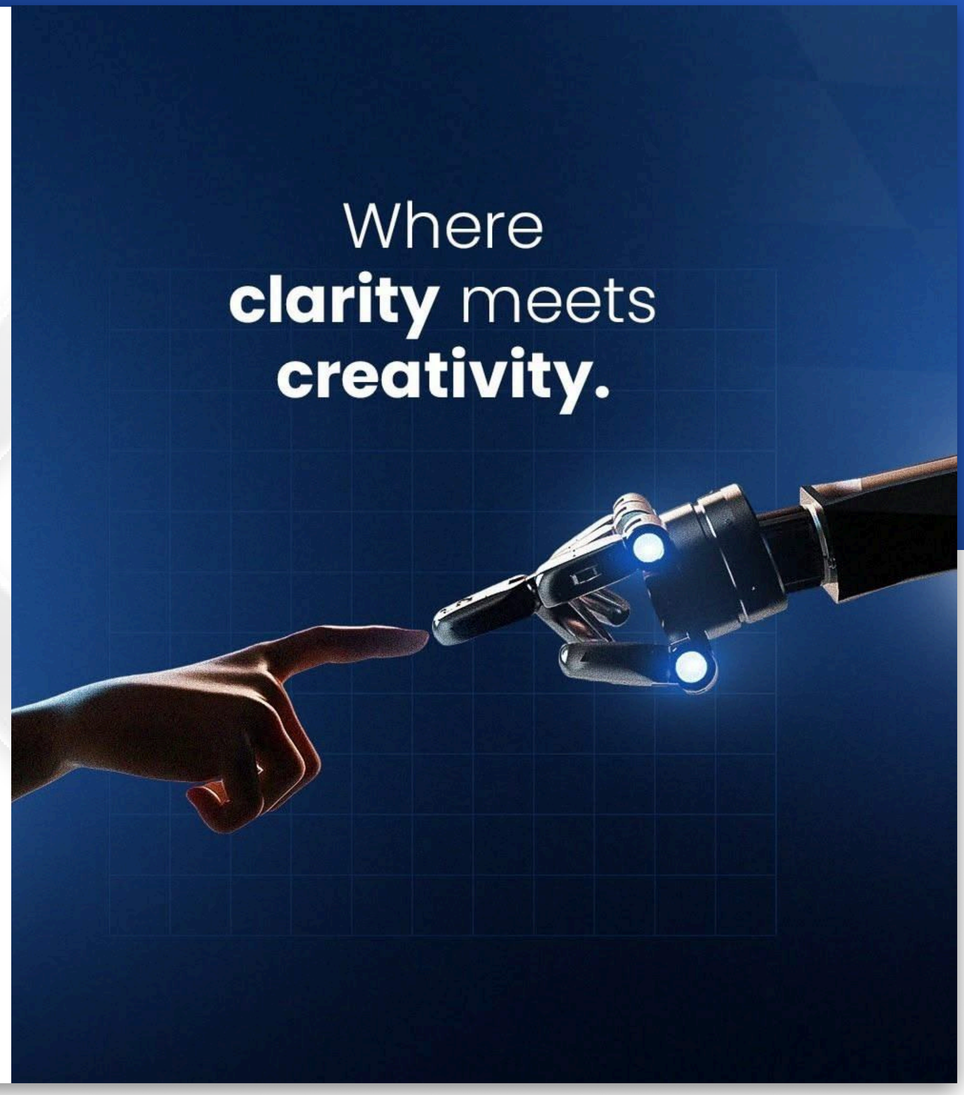
Two Kinds Of Founders. One Studio That Builds For Both.

OPERATIONAL OPTIMIZER

Running a business that works should not mean being buried in manual effort. Too often growth is chained to repetitive tasks, endless spreadsheets, and processes that expand only with headcount instead of technology. At Xylozen, we provide more than engineering ongoing technical support and dedicated maintenance, ensuring every system remains efficient, scalable, and resilient long after launch.

VISIONARY NON TECH FOUNDER

Xylozen is a partner, not a vendor. A studio devoted to founders and enterprises who expect more. Our craft spans Agentic AI, Micro SaaS, web applications, and MVP development. Each product is created with precision, shaped with purpose, and delivered with unwavering commitment.



The Innovation Path

Through Our Five-Step Process, From The Moment That First Glimmering Idea Comes To Mind Until Completion, We Transform Our Ideas Into Actual Technology Through A Deliberate Progression Of Steps That Build Upon Each Other And Ensure No Shortcuts And Nothing Is Overlooked.

Ideation

Cultivate Visionary Concepts Through Strategic Foresight, Market Intelligence, And Creative Synthesis.

Definition

Distill Challenges Into Precise Objectives, Establishing Measurable Outcomes And Strategic Clarity.

Design

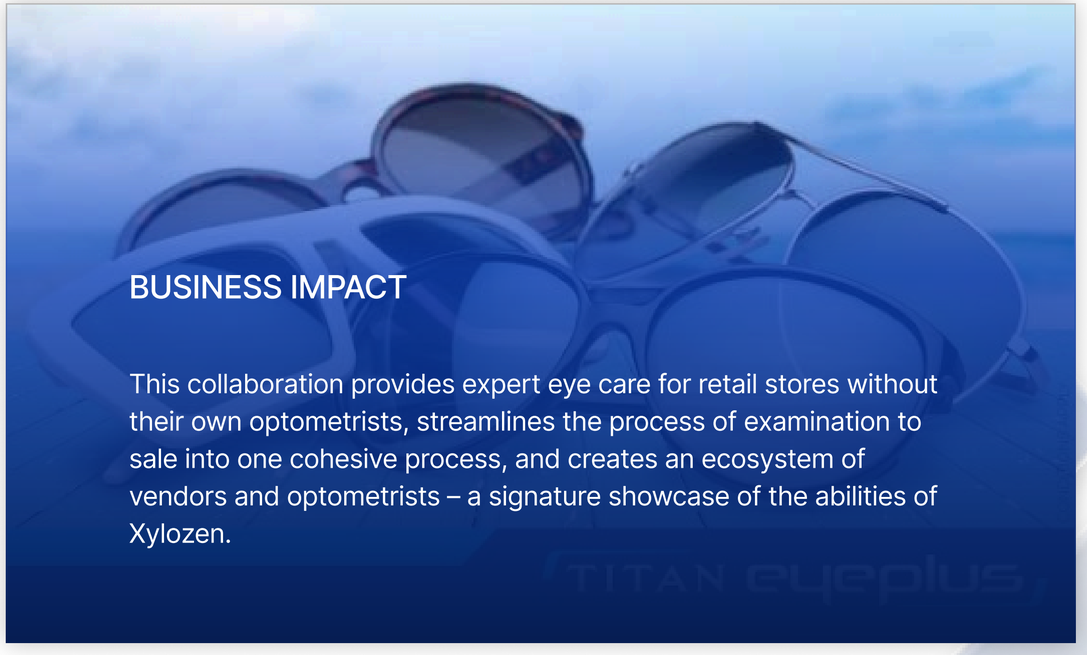
Engineer Sophisticated Blueprints, Align Technology Stacks, And Craft Actionable Execution Pathways.

Prototype

Construct Lean MVPs To Validate Assumptions, Secure Investor Confidence, And Capture Early Feedback.

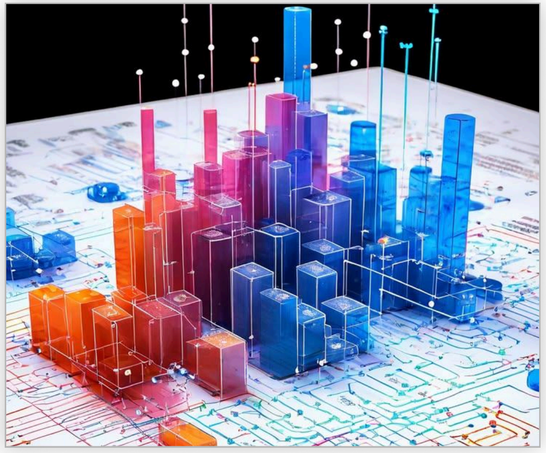
Integration

Delivering Micro-SaaS, Web Applications, And Agentic AI To Automate, Scale, And Accelerate Business Outcomes.



BUSINESS IMPACT

This collaboration provides expert eye care for retail stores without their own optometrists, streamlines the process of examination to sale into one cohesive process, and creates an ecosystem of vendors and optometrists – a signature showcase of the abilities of Xylozen.



CRAFTSMANSHIP AT NATIONAL SCALE

Titan Eye Plus

Live video consultation
Global network
Any store, anoptometristy time

Remote access to in-store devices
Real-time machine operation
Clinical-grade fidelity

Instant diagnostic capture
Direct hand-off to sales workflow
Nothing re-entered, nothing lost

Designed, engineered & deployed in one month
Taken live across the network
Reliability worthy of the Tata legacy

Powered By AI Agents, Engineered For Accuracy

CASE STUDIES

We Create Smart Machines Which Are Not Only Efficient In Working But Also Always Right In Their Work.

The Only Thing That Really Matters Is Reliability.
It Doesn’t Matter Whether We Are Talking About Automation Or Agential Workflow.

+97%

Across The AI-Driven Systems We’ve Built And Deployed.

Our AI agents and automatons are always analyzed, evaluated, and upgraded so that accuracy becomes an inherent part of the process rather than a guarantee.

Recruitment, Refined

HireAI

A traditional method of manual screening of resumes was hampering our hiring process by not evaluating candidates properly, putting more burden on recruiters, and a lack of automation.

Hence, we developed **HireAI**, which is an **AI-powered recruitment tool** that uses natural language processing technology for screening resumes and skill mining from the resume along with ranking the candidates and a dashboard for recruiters.

01

99%

Faster Screening

Resume Screening, Extraction, And Matching Against Job Criteria Can Be Done Within Seconds, Not Hours.

02

89%

Reduction In Manual Review

Candidates Are Automatically Screened, Rated, And Shortlisted. No Need For Any Manual Screening.

03

94%

Match Accuracy

Candidates Are Rated Based On Actual Relevance, Experience, And Skills. No Guesswork Involved.

Key Capabilities & Impact

The time it takes to screen candidates has reduced from days to just minutes, there is more consistency in hiring, and only the most qualified candidates are considered for hire.

AI Resume Parsing

Auto-parses skills, experience, education, certifications, and other information from all resumes received.

Intelligent Candidate Matching

Scores candidates based on the compatibility of their skills, job profile, experience, etc.

Recruiter Dashboard

Offers recruiters a single-pane-of-glass solution with all of the features mentioned above.

Scalable Micro-SaaS

Developed using a multi-tenant cloud-based architecture that is easily scalable.

AI-Powered Construction Safety Monitoring

Manual site safety monitoring was ineffective. It was difficult to monitor the use of helmets at multiple sites, inspections were resource-heavy, and there was no way to do this without increasing costs.

To solve this problem, our team came up with an AI-based construction safety system that provides real-time **PPE detection** through computer vision and **AI-powered safety alerts.**

01

87%

Faster Violation Detection

Analysis of real-time CCTV feed for identification of workers without helmet on.

02

67%

Reduction In Manual Inspections

Violations will be immediately noticed by supervisors when they occur.

03

99%

Compliance Visibility

Each site is connected to one central dashboard wherein audit analysis and reporting are performed.

Key Capabilities & Impact

With the decline in manual checks and the takeover by AI in doing the detection, compliance becomes better and monitoring costs reduce, violations are detected faster, and reporting and auditing become easy.

Real-Time PPE Detection

Continuously analyzes live video to detect helmets and identify violations instantly.

Alerts & Multi-Site Monitoring

Sends instant notifications to supervisors across every site from one centralized platform.

Evidence & Audit Trail

Captures snapshots and compliance logs to keep every incident investigation-ready.

Compliance Analytics

Gives management centralized visibility into violations, site trends, and compliance performance.

Built Local & Delivered Global

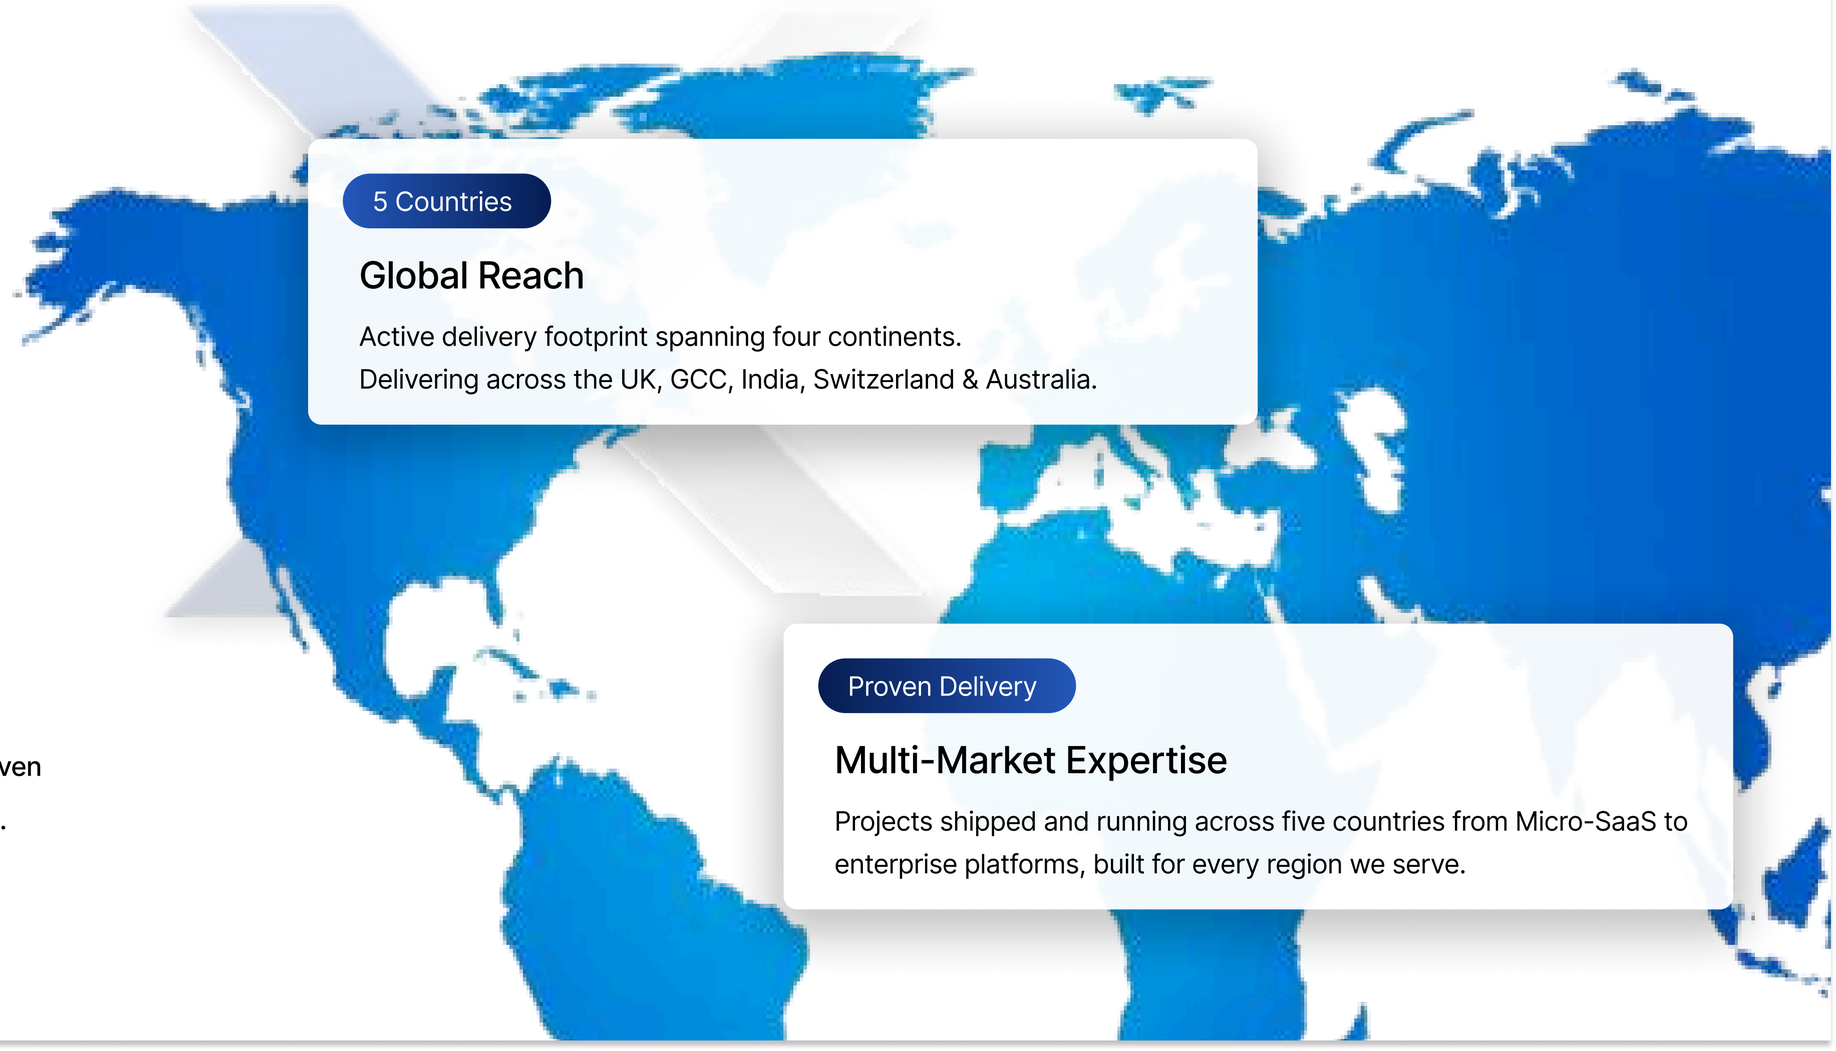
United Kingdom: Delivering Scalable Micro-SaaS Solutions Built For Diverse Business Needs.

GCC: Building MVPs And Agentic AI That Turn Concepts Into Market-Ready Products.

India: Delivering Modern, Secure, And Business-Focused Web Applications.

Switzerland: Powering Seamless User Experiences Through High-Quality Web Solutions.

Australia: Building Secure, Performance-Driven Platforms That Enhance Digital Engagement.



5 Countries

Global Reach

Active delivery footprint spanning four continents. Delivering across the UK, GCC, India, Switzerland & Australia.

Proven Delivery

Multi-Market Expertise

Projects shipped and running across five countries from Micro-SaaS to enterprise platforms, built for every region we serve.

Core Operators

Engineering Excellence

Resilient Systems Engineered From The Ground Up, Embedding Agentic AI Into Scalable Products. Deployment Cycles Are Reduced By Forty Percent, And Complex Ideas Are Transformed Into Usable, High-Impact Solutions.

Strategic Growth

A Sharp Focus On Partnerships And Financial Stewardship Secured High-Value Contracts And Scaled Revenue Streams By Twenty-Five Percent, Positioning The Studio For Sustainable Growth.

AI-Native Future

Meticulously Designed Campaigns Amplified Brand Presence Across Both Digital And Offline Channels. The Result Was A Thirty Percent Increase In Client Acquisition, Converting Vision Into Measurable Traction.

Market Leadership

Advanced AI And ML Models Are Woven Into Production Workflows, Delivering Thirty-Five Percent Efficiency Gains, With Automation And Predictive Analytics Preparing Every System To Scale Globally.
